

6 **Draft Standard for**  
7 **Local and metropolitan area networks—**  
8 **Bridges and Bridged Networks**

9 **Amendment 39:**  
10 **YANG Data Models for the**  
11 **Credit-Based Shaper**

12 Prepared by the

13 **Time-Sensitive Networking (TSN) Task Group of IEEE 802.1**

14 Sponsor

**LAN/MAN Standards Committee  
of the  
IEEE Computer Society**

18 **This and the following cover pages are not part of the draft.** They provide revision and other information  
19 for IEEE 802.1 Working Group members and participants in the IEEE Standards Association ballot process,  
20 and will be updated as convenient. The text proper of this draft begins with the [Title page](#).

### **Important Notice**

This document is an unapproved draft of a proposed IEEE Standard. IEEE hereby grants the named IEEE SA Working Group or Standards Committee Chair permission to distribute this document to participants in the receiving IEEE SA Working Group or Standards Committee, for purposes of review for IEEE standardization activities. No further use, reproduction, or distribution of this document is permitted without the express written permission of IEEE Standards Association (IEEE SA). Prior to any review or use of this draft standard, in part or in whole, by another standards development organization, permission must first be obtained from IEEE SA ([stds-copyright@ieee.org](mailto:stds-copyright@ieee.org)). This page is included as the cover of this draft, and shall not be modified or deleted.

IEEE Standards Association  
445 Hoes Lane  
Piscataway, NJ 08854, USA

## 1 **Current draft**

2 The text of this draft, following these cover pages, is that of P802.1Qdx as of the final Working Group  
3 Recirculation Ballot with the omission of change bars showing changes from prior drafts.

## 4 **Base standard**

5 This draft is being submitted to SA Ballot prior to completion of the SA Ballot of another amendment  
6 (P802.1Qdj) to the base standard, IEEE Std 802.1Q. There is currently no technical overlap between these  
7 amendments, and the editorial interaction is limited to the numbering of minor clauses and figures which are  
8 added to the end of their enclosing clause. The current numbering in this draft anticipates the prior approval  
9 and pre-publication editing of P802.1Qdj, while the editing instructions accomodate the possibility of further  
10 numbering changes.

## 11 **MIB and YANG modules**

12 The YANG modules specified by this standard are attached to the draft pdf as plain text (UTF-8) .yang files.

13

This document is an unapproved draft of a proposed IEEE Standard. As such, this document is subject to change. USE AT YOUR OWN RISK! IEEE copyright statements SHALL NOT BE REMOVED from draft or approved IEEE standards, or modified in any way. Because this is an unapproved draft, this document must not be utilized for any conformance/compliance purposes. Permission is hereby granted for officers from each IEEE Standards Working Group or Committee to reproduce the draft document developed by that Working Group for purposes of international standardization consideration. IEEE Standards Department must be informed of the submission for consideration prior to any reproduction for international standardization consideration ([stds.ipr@ieee.org](mailto:stds.ipr@ieee.org)). Prior to adoption of this document, in whole or in part, by another standards development organization, permission must first be obtained from the IEEE Standards Department ([stds.ipr@ieee.org](mailto:stds.ipr@ieee.org)). When requesting permission, IEEE Standards Department will require a copy of the standard development organization's document highlighting the use of IEEE content. Other entities seeking permission to reproduce this document, in whole or in part, must also obtain permission from the IEEE Standards Department.

IEEE Standards Department

Piscataway, NJ 08854, USA

1 **Abstract:** This amendment to IEEE Std 802.1Q-2022 as amended by IEEE Std 802.1Qcz-2023,  
2 IEEE Std 802.1Qcw-2023, and IEEE Std 802.1Qcj-2023 specifies a YANG data model that  
3 supports configuration and status reporting for credit-based shaper algorithm capabilities in bridges  
4 and end stations.

5 **Keywords:** Bridged Network, IEEE 802.1Q™, LAN, local area network, MAC Bridge, metropolitan  
6 area network, credit-based shaper algorithm, YANG.

## 1 Important Notices and Disclaimers Concerning IEEE Standards 2 Documents

3 IEEE Standards documents are made available for use subject to important notices and legal disclaimers.  
4 These notices and disclaimers, or a reference to this page (<https://standards.ieee.org/ipr/disclaimers.html>),  
5 appear in all standards and may be found under the heading “Important Notices and Disclaimers Concerning  
6 IEEE Standards Documents.”

### 7 Notice and Disclaimer of Liability Concerning the Use of IEEE Standards 8 Documents

9 IEEE Standards documents are developed within IEEE Societies and subcommittees of IEEE Standards  
10 Association (IEEE SA) Board of Governors. IEEE develops its standards through an accredited consensus  
11 development process, which brings together volunteers representing varied viewpoints and interests to  
12 achieve the final product. IEEE Standards are documents developed by volunteers with scientific, academic,  
13 and industry-based expertise in technical working groups. Volunteers are not necessarily members of IEEE  
14 or IEEE SA and participate without compensation from IEEE. While IEEE administers the process and  
15 establishes rules to promote fairness in the consensus development process, IEEE does not independently  
16 evaluate, test, or verify the accuracy of any of the information or the soundness of any judgments contained  
17 in its standards.

18 IEEE makes no warranties or representations concerning its standards, and expressly disclaims all  
19 warranties, express or implied, concerning this standard, including but not limited to the warranties of  
20 merchantability, fitness for a particular purpose and non-infringement. In addition, IEEE does not warrant or  
21 represent that the use of the material contained in its standards is free from patent infringement. IEEE  
22 standards documents are supplied “AS IS” and “WITH ALL FAULTS.”

23 Use of an IEEE standard is wholly voluntary. The existence of an IEEE Standard does not imply that there  
24 are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to  
25 the scope of the IEEE standard. Furthermore, the viewpoint expressed at the time a standard is approved and  
26 issued is subject to change brought about through developments in the state of the art and comments  
27 received from users of the standard.

28 In publishing and making its standards available, IEEE is not suggesting or rendering professional or other  
29 services for, or on behalf of, any person or entity, nor is IEEE undertaking to perform any duty owed by any  
30 other person or entity to another. Any person utilizing any IEEE Standards document, should rely upon his or  
31 her own independent judgment in the exercise of reasonable care in any given circumstances or, as appropriate,  
32 seek the advice of a competent professional in determining the appropriateness of a given IEEE standard.

33 IN NO EVENT SHALL IEEE BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL,  
34 EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO: THE  
35 NEED TO PROCURE SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR  
36 BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY,  
37 WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR  
38 OTHERWISE) ARISING IN ANY WAY OUT OF THE PUBLICATION, USE OF, OR RELIANCE UPON  
39 ANY STANDARD, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE AND  
40 REGARDLESS OF WHETHER SUCH DAMAGE WAS FORESEEABLE.

### 41 Translations

42 The IEEE consensus development process involves the review of documents in English only. In the event  
43 that an IEEE standard is translated, only the English version published by IEEE is the approved IEEE  
44 standard.

## 1 Official statements

2 A statement, written or oral, that is not processed in accordance with the IEEE SA Standards Board  
3 Operations Manual shall not be considered or inferred to be the official position of IEEE or any of its  
4 committees and shall not be considered to be, nor be relied upon as, a formal position of IEEE. At lectures,  
5 symposia, seminars, or educational courses, an individual presenting information on IEEE standards shall  
6 make it clear that the presenter's views should be considered the personal views of that individual rather  
7 than the formal position of IEEE, IEEE SA, the Standards Committee, or the Working Group. Statements  
8 made by volunteers may not represent the formal position of their employer(s) or affiliation(s).

## 9 Comments on standards

10 Comments for revision of IEEE Standards documents are welcome from any interested party, regardless of  
11 membership affiliation with IEEE or IEEE SA. However, **IEEE does not provide interpretations,**  
12 **consulting information, or advice pertaining to IEEE Standards documents.**

13 Suggestions for changes in documents should be in the form of a proposed change of text, together with  
14 appropriate supporting comments. Since IEEE standards represent a consensus of concerned interests, it is  
15 important that any responses to comments and questions also receive the concurrence of a balance of interests.  
16 For this reason, IEEE and the members of its Societies and subcommittees of the IEEE SA Board of  
17 Governors are not able to provide an instant response to comments, or questions except in those cases where  
18 the matter has previously been addressed. For the same reason, IEEE does not respond to interpretation  
19 requests. Any person who would like to participate in evaluating comments or in revisions to an IEEE standard  
20 is welcome to join the relevant IEEE working group. You can indicate interest in a working group using the  
21 Interests tab in the Manage Profile & Interests area of the [IEEE SA myProject system](#).<sup>1</sup> An IEEE Account is  
22 needed to access the application.

23 Comments on standards should be submitted using the [Contact Us](#) form.<sup>2</sup>

## 24 Laws and regulations

25 Users of IEEE Standards documents should consult all applicable laws and regulations. Compliance with the  
26 provisions of any IEEE Standards document does not constitute compliance to any applicable regulatory  
27 requirements. Implementers of the standard are responsible for observing or referring to the applicable  
28 regulatory requirements. IEEE does not, by the publication of its standards, intend to urge action that is not  
29 in compliance with applicable laws, and these documents may not be construed as doing so.

## 30 Data privacy

31 Users of IEEE Standards documents should evaluate the standards for considerations of data privacy and  
32 data ownership in the context of assessing and using the standards in compliance with applicable laws and  
33 regulations.

## 34 Copyrights

35 IEEE draft and approved standards are copyrighted by IEEE under US and international copyright laws.  
36 They are made available by IEEE and are adopted for a wide variety of both public and private uses. These  
37 include both use, by reference, in laws and regulations, and use in private self-regulation, standardization,  
38 and the promotion of engineering practices and methods. By making these documents available for use and  
39 adoption by public authorities and private users, neither IEEE nor its licensors waive any rights in copyright  
40 to the documents.

<sup>1</sup> Available at: <https://development.standards.ieee.org/myproject-web/public/view.html#landing>.

<sup>2</sup> Available at: <https://standards.ieee.org/content/ieee-standards/en/about/contact/index.html>.

## 1 Photocopies

2 Subject to payment of the appropriate licensing fees, IEEE will grant users a limited, non-exclusive license  
3 to photocopy portions of any individual standard for company or organizational internal use or individual,  
4 non-commercial use only. To arrange for payment of licensing fees, please contact Copyright Clearance  
5 Center, Customer Service, 222 Rosewood Drive, Danvers, MA 01923 USA; +1 978 750 8400;  
6 <https://www.copyright.com/>. Permission to photocopy portions of any individual standard for educational  
7 classroom use can also be obtained through the Copyright Clearance Center.

## 8 Updating of IEEE Standards documents

9 Users of IEEE Standards documents should be aware that these documents may be superseded at any time  
10 by the issuance of new editions or may be amended from time to time through the issuance of amendments,  
11 corrigenda, or errata. An official IEEE document at any point in time consists of the current edition of the  
12 document together with any amendments, corrigenda, or errata then in effect.

13 Every IEEE standard is subjected to review at least every 10 years. When a document is more than 10 years  
14 old and has not undergone a revision process, it is reasonable to conclude that its contents, although still of  
15 some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that  
16 they have the latest edition of any IEEE standard.

17 In order to determine whether a given document is the current edition and whether it has been amended  
18 through the issuance of amendments, corrigenda, or errata, visit [IEEE Xplore](#) or [contact IEEE](#).<sup>3</sup> For more  
19 information about the IEEE SA or IEEE's standards development process, visit the IEEE SA Website.

## 20 Errata

21 Errata, if any, for all IEEE standards can be accessed on the [IEEE SA Website](#).<sup>4</sup> Search for standard number  
22 and year of approval to access the web page of the published standard. Errata links are located under the  
23 Additional Resources Details section. Errata are also available in [IEEE Xplore](#). Users are encouraged to  
24 periodically check for errata.

## 25 Patents

26 IEEE Standards are developed in compliance with the [IEEE SA Patent Policy](#).<sup>5</sup>

27 Attention is called to the possibility that implementation of this standard may require use of subject matter  
28 covered by patent rights. By publication of this standard, no position is taken by the IEEE with respect to the  
29 existence or validity of any patent rights in connection therewith. If a patent holder or patent applicant has  
30 filed a statement of assurance via an Accepted Letter of Assurance, then the statement is listed on the  
31 IEEE SA Website at <https://standards.ieee.org/about/sasb/patcom/patents.html>. Letters of Assurance may  
32 indicate whether the Submitter is willing or unwilling to grant licenses under patent rights without  
33 compensation or under reasonable rates, with reasonable terms and conditions that are demonstrably free of  
34 any unfair discrimination to applicants desiring to obtain such licenses.

35 Essential Patent Claims may exist for which a Letter of Assurance has not been received. The IEEE is not  
36 responsible for identifying Essential Patent Claims for which a license may be required, for conducting  
37 inquiries into the legal validity or scope of Patents Claims, or determining whether any licensing terms or  
38 conditions provided in connection with submission of a Letter of Assurance, if any, or in any licensing  
39 agreements are reasonable or non-discriminatory. Users of this standard are expressly advised that  
40 determination of the validity of any patent rights, and the risk of infringement of such rights, is entirely their  
41 own responsibility. Further information may be obtained from the IEEE Standards Association.

<sup>3</sup> Available at: <https://ieeexplore.ieee.org/browse/standards/collection/ieee>.

<sup>4</sup> Available at: <https://standards.ieee.org/standard/index.html>.

<sup>5</sup> Available at: <https://standards.ieee.org/about/sasb/patcom/materials.html>.

## 1 **IMPORTANT NOTICE**

2 IEEE Standards do not guarantee or ensure safety, security, health, or environmental protection, or ensure  
3 against interference with or from other devices or networks. IEEE Standards development activities consider  
4 research and information presented to the standards development group in developing any safety  
5 recommendations. Other information about safety practices, changes in technology or technology  
6 implementation, or impact by peripheral systems also may be pertinent to safety considerations during  
7 implementation of the standard. Implementers and users of IEEE Standards documents are responsible for  
8 determining and complying with all appropriate safety, security, environmental, health, and interference  
9 protection practices and all applicable laws and regulations.

## 1 Participants

2 <<The following lists will be updated in the usual way prior to publication>>

3 At the time this standard was submitted to the IEEE-SA Standards Board for approval, the IEEE 802.1  
4 Working Group had the following membership:

5 **Glenn Parsons, *Chair***  
6 **Jessy V. Rouyer, *Vice Chair***  
7 **János Farkas, *Chair, Time-Sensitive Networking Task Group***  
8 **Craig Gunther, *Vice Chair, Time-Sensitive Networking Task Group***  
9 **Abdul Jabbar, *Editor***  
10

<<TBA>>

<sup>1</sup> The following members of the individual balloting committee voted on this standard. Balloters may have  
<sup>2</sup> voted for approval, disapproval, or abstention.

<<TBA>>

<sup>3</sup> When the IEEE-SA Standards Board approved this standard on XX Month 20xx, it had the following  
<sup>4</sup> membership:

<sup>5</sup> <<TBA>>

<<TBA>>

<sup>6</sup>  
<sup>7</sup> \*Member Emeritus

## 1 Introduction

This introduction is not part of IEEE Std 802.1Qdx™-2024, IEEE Standard for Local and Metropolitan Area Networks— Bridges and Bridged Networks—Amendment 38: YANG Data Models for the Credit-Based Shaper.

2 IEEE Std 802.1Qdx™-2024: YANG Data Models for the Credit-Based Shaper addresses the need to manage  
3 the credit-based shaper algorithm via a YANG model compatible with modern management systems.

4 This standard contains state-of-the-art material. The area covered by this standard is undergoing evolution.  
5 Revisions are anticipated within the next few years to clarify existing material, to correct possible errors, and  
6 to incorporate new related material. Information on the current revision state of this and other IEEE 802  
7 standards may be obtained from

8 Secretary, IEEE-SA Standards Board  
9 445 Hoes Lane  
10 Piscataway, NJ 08854-4141

2 **IEEE Standard for**  
3 **Local and Metropolitan Area Networks—**

4 **Bridges and Bridged Networks**

5 **Amendment 39:**  
6 **YANG Data Models for the**  
7 **Credit-Based Shaper**

8 (This amendment is based on IEEE Std 802.1Q™-2022 as amended by IEEE Std 802.1Qcz™-2023,  
9 IEEE Std 802.1Qcw™-2023, and IEEE Std 802.1Qcj™-2023.)

10 NOTE—The editing instructions contained in this amendment define how to merge the material contained therein into  
11 the existing base standard and its amendments to form the comprehensive standard.

12 The editing instructions are shown in *bold italics*. Four editing instructions are used: change, delete, insert, and replace.  
13 ***Change*** is used to make corrections in existing text or tables. The editing instruction specifies the location of the change  
14 and describes what is being changed by using ~~striketrough~~ (to remove old material) and underscore (to add new  
15 material). ***Delete*** removes existing material. ***Insert*** adds new material without disturbing the existing material. Deletions  
16 and insertions may require renumbering. If so, renumbering instructions are given in the editing instruction. ***Replace*** is  
17 used to make changes in figures or equations by removing the existing figure or equation and replacing it with a new  
18 one. Editing instructions, change markings, and this note will not be carried over into future editions because the  
19 changes will be incorporated into the base standard.<sup>6</sup>

20

---

<sup>6</sup> Notes in text, tables, and figures are given for information only and do not contain requirements needed to implement the standard.

1 **48. YANG Data Models**

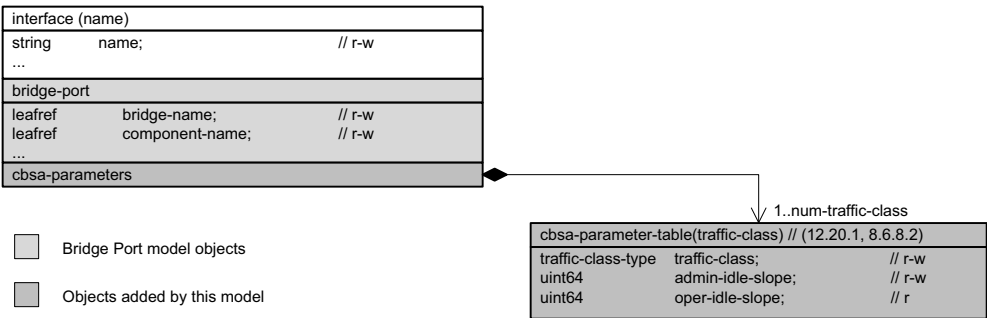

2 **48.2 IEEE 802.1Q YANG models**

3 *Insert 48.12.13 at the end of 48.2 as follows:*

4 **48.2.13 Credit-based shaper algorithm model**

5 The credit-based shaper algorithm model augments the Bridge Port model (48.2.1) with nodes that represent  
6 the managed objects of credit-based shaper algorithm in Table 12-4.

7 The credit-based shaper algorithm model is illustrated in Figure 48-23.

**Figure 48-23—Credit-based shaper algorithm model**

### 48.3 Structure of the YANG models

*Insert the following rows at the end of Table 48-1 as follows (unchanged rows not shown):*

**Table 48-1—Summary of the YANG modules**

Module	References	Managed functionality	Initial YANG specification Notes
ieee802-dot1q-cbsa	48.6.24	8.6.8.2	IEEE Std 802.1Qdx credit-based shaper algorithm module
ieee802-dot1q-cbsa-bridge	48.6.25	8.6.8.2	IEEE Std 802.1Qdx Augments Bridge Port with credit-based shaper algorithm module.

*Insert 48.3.13 at the end of 48.3 as follows:*

#### 48.3.13 Credit-based shaper algorithm model

A bridge implementing the credit-based shaper algorithm model (48.2.13) implements the YANG modules in Table 48-14.

**Table 48-14—Credit-based shaper algorithm model YANG modules**

YANG Module
ieee802-types
ieee802-dot1q-types
ieee-802-dot1q-tsn-types
ieee802-dot1q-bridge
ieee802-dot1q-cbsa
ieee802-dot1q-cbsa-bridge

## **1 48.4 Security considerations**

*2 Insert 48.4.13 at the end of 48.4 as follows:*

### **3 48.4.13 Security considerations of the credit-based shaper algorithm model**

4 The following objects in the ieee802-dot1q-cbsa YANG module could be manipulated to interfere with the  
5 operation of the credit-based shaper algorithm. This could, for example, be used to force a reinitialization of  
6 credit-based shaper algorithm state, thus causing network instability.

7       interfaces/interface/bridge-port/cbsa-parameters/cbsa-parameter-table

8

## 1 48.5 YANG schema tree definitions

2 *Insert 48.5.24 at the end of 48.5 as follows:*

### 3 48.5.24 Schema for the ieee802-dot1q-cbsa YANG module

4 This YANG module does not have a YANG schema tree.

5 *Insert 48.5.25 as follows:*

### 6 48.5.25 Schema for the ieee802-dot1q-cbsa-bridge YANG module

```
7 module: ieee802-dot1q-cbsa-bridge
8
9   augment /if:interfaces/if:interface/dot1q:bridge-port:
10     +--rw cbsa-parameters {credit-based-shaper-algorithm}?
11       +--rw cbsa-parameter-table* [traffic-class]
12         +--rw traffic-class          dot1q-types:traffic-class-type
13         +--rw admin-idle-slope?      uint64
14         +--ro oper-idle-slope?       uint64
```

15

## 1 48.6 YANG modules<sup>7 8 9</sup>

2 *Insert 48.6.24 at the end of 48.6, renumbering as necessary, as follows:*

### 3 48.6.24 The ieee802-dot1q-cbsa YANG module

```
4 module ieee802-dot1q-cbsa {
5   namespace "urn:ieee:std:802.1Q:yang:ieee802-dot1q-cbsa";
6   prefix cbsa;
